

Sudharshan Reddy

Software Developer

✉ sudharshan0207@gmail.com ☎ +91 7013989593 📍 Hyderabad 🌐 Sudharshan0207

PROFILE

Aspiring AI/ML Engineer with hands-on experience building **production-grade AI systems**, including a deployed **RAG-based SaaS platform**. Strong in Python, machine learning, and data pipelines with exposure to MLOps, FastAPI, and vector databases. Passionate about solving real-world optimization problems in logistics, supply chain, and intelligent decision systems.

PROFESSIONAL EXPERIENCE

Randstad, Software Associate 08/2025 – 11/2025 | Bangalore

- Developed and maintained **RESTful APIs using Java and Spring Boot**
- Implemented **CRUD operations using Spring Data JPA and Hibernate with MySQL**
- Contributed to **microservices-based backend architecture**
- Integrated backend services using **JSON-based communication**
- Performed **API testing using Postman** to ensure reliability
- Debugged and optimized application performance
- Used **Maven for build automation and dependency management**
- Participated in **Agile development practices**, including stand-ups and code reviews

EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology,
BACHELORS: Electronics and communication engineering
CGPA:7.35 12/2020 – 05/2024 | Hyderabad, India

Sri Chaitanya Junior Kalasala, INTERMEDIATE
Percentage:95.7% 06/2018 – 10/2020 | Vijayawada, India

SKILLS

TECHNICAL (Programming: Python, SQL • **ML/AI:** Scikit-learn, Pandas, NumPy, NLP, Embeddings, RAG • **Frameworks:** FastAPI, PyTorch (basic), TensorFlow (basic) • **MLOps:** Docker, CI/CD, MLflow (basic), Git • **Databases:** PostgreSQL, Vector DB (FAISS/Pinecone) • **Tools:** GitHub Actions, Jupyter, Linux • **Concepts:** Feature Engineering, Model Evaluation, Data Pipelines, API Development) |
PERSONAL (Adaptability • Team management • Problem Solving • Project management • Collaboration and Communication)

LANGUAGES

English, Telugu,Hindi

COURSES

Data Structures and Algorithms, *coursera*

The Complete Python Master Class, *Udemy*

Complete A.I. & Machine Learning, Data Science, *Udemy*

PROJECTS

1. RAG-Based SaaS Document Intelligence Platform

Tech: FastAPI, Vector DB, Embeddings, Python

- Built a scalable **Retrieval-Augmented Generation (RAG)** system for querying PDFs using embeddings and semantic search
- Designed **data ingestion pipelines** for document parsing, chunking, and indexing
- Implemented **low-latency APIs** using FastAPI for real-time query responses
- Integrated vector database for efficient similarity search
- Achieved improved response accuracy using context-aware retrieval

2. Supply Chain Demand Forecasting System

Tech: Python, Scikit-learn, Pandas, Time Series

- Built a **machine learning model to predict product demand** using historical sales data
- Implemented regression models (Linear Regression, Random Forest, XGBoost)
- Performed **feature engineering** (seasonality, trends, lag features)
- Evaluated models using RMSE, MAE for forecasting accuracy
- Designed pipeline for **data preprocessing → training → evaluation**
